Facilities

1. **The Archives of Hokkaido**
   - The Archives of Hokkaido store a collection of historical materials and records, and serve as a facility to provide useful information for your historical study and researches.

2. **“AKARENGA” Branch of Hokkaido Museum**
   - This is the satellite room, a branch of the Hokkaido Museum, which is located in the Nopporo Forest Park in Atsubetsu-ku, Sapporo. Visitors can find out information about the various museums in Hokkaido, as well as learn about the nature, history and culture of the prefecture through the interesting, stimulating displays. ☎️ 011-898-0466 (Hokkaido Museum; Japanese only)

3. **Karafuto/Sakhalin Related Resources Library**
   - This Resources Library displays materials about Southern Karafuto, and introduces current situation in exchange with Sakhalin. It is a library that gives people an opportunity to learn about the history and the situation about Karafuto (Sakhalin).

4. **The Red Brick Northern Territories Museum**
   - In the Red Brick Northern Territories Museum, are panels and materials that describe the history of the Northern Territories. The various displays in this room provide information on the Northern Territories issues. ☎️ 011-204-5069 (direct; Japanese only)

5. **Exhibition Room of Hokkaido’s International Exchanges and Local Products**
   - This exhibition room displays commemorative goods from affiliating and/or sister-city relationships, as well as special products from various cities within Hokkaido.

6. **Tourism Information**
   - This part of the building displays posters depicting four different seasons in Hokkaido, and also has a computer prepared specifically for searching tourism information. It provides guests with tourism updates for various parts of Hokkaido, promoting them for visitors from in and out of the prefecture.

### Highlights

- **Air vents and roof**
  - Air vents that look like chimneys and roof cresting have a design that caught on in Western architecture in the Meiji era, and lightning rods are designed to double as decoration.

- **Bricks**
  - About 2.5 million bricks were made in Shiroishi and Toyohira villages (presently in Sapporo). The French-style brickwork, where longitudinal and transverse bricks are laid alternately, is relatively rare in Japan.

- **Three-section arch**
  - The main hall features a beautiful three-section arch. The staircase is decorative as typified by western architecture with ornaments in the middle of the arch, sculptures on upper steel poles, the circular design (rosette) modeled for roses engraved on the side of the stairway, etc.

- **Double windows**
  - A variety of devices to provide protection against the cold winter can be seen in various places. For example, windows appear single paned, but they are double paned. Glass doors are normally folded in three inside the wooden frames installed on both sides of windows.

- **Beautiful back**
  - With its simple and stylish design and two towering chimneys, the back of akarenga looks beautiful. Compared with lively make-up of the front, the back is plain with little decoration, emanating an air typical of brick buildings.

### Additional Information

- **Historical Paintings**
  - Akarenga is decorated with 20 paintings produced by artists from Hokkaido. They feature historical facts regarding development from the closing years of the Edo era to the middle of the Meiji era.

- **1 Dr. Clark’s Departure from Shimamatsu in Farewell to His Students**
  - Tadao Tanaka, painted in the western style

- **2 Takeshiro Matsura at Lake Akan**
  - Eien Iwahashi, painted in the Japanese style
The symbol of Hokkaido

The Former Hokkaido Government Building, whose red appearance contrasts beautifully in every season, has gained wide popularity with its nickname akarenga, or “Red Bricks”. Completed in 1888, the American neo-baroque style brick building was designed by engineers of the Hokkaido Government and was constructed with many local building materials.

It played a pivotal role in Hokkaido over the 80 years until the new government building was constructed. Measuring 61m in frontage, 36m in depth and and 33m in height up to the tower top, akarenga is equivalent in size to a present-day 10-story building.

At that time, it was one of the largest buildings in Japan. The octagonal dome towering on the building was constructed in 1873 according to the plan by Capron, an American advisor to the Development Commission, modeling for the octagonal dome of the Hokkaido Development Commission Sapporo Main Office, which was burned down six years later.

In those days, an architectural style of topping buildings with domes was popular in the U.S.A as the symbol of independence and enterprising spirit. In 1886, the Hokkaido Government was established and 1st Governor Michitoshi Iwamura, nostalgic about the octagonal dome, ordered the construction of a dome on top of akarenga when the government building was built.

Although the inside of akarenga was burned by a fire in 1909, the red brick walls luckily sustained little damage. Restoration work was initiated the following year and was completed in 1911.

In 1968, it was restored to its original state in commemoration of the centennial anniversary of Hokkaido, and its permanent preservation was determined.

Today, there are a few western-style architectural structures from the Meiji era as fabulous as akarenga in Japan, and it was designated as a National Important Cultural Property in 1969.

The Footsteps of Hokkaido and Akarenga

659 Abe no Hirafu's Ezo expedition; Abe no Hirafu sends off local administrators the following year
1205 Andō-shi from Tsugaru becomes a magistrate of Ezo
1514 Andō-shi leaves Ezo in charge of Kakizaki-shi (later renamed Matsumae-shi)
1595 Kakizaki-shi is recognized by Toyotomi Hideyoshi as the ruler of Ezo
1799 Takadaya Kabe establishes the Etorofu Sea Route
1800 Inō Tadataka measures the land of Ezo
1808 Mamiya Rinzei discovers the Strait of Mamiya, also known as Tatar Strait
1845 Matsu’ura Takeshiro probes the land of Ezo
1869 Matsushima Takeshiro proposes six alternative names for Ezo. The Government renames Ezo to Hokkaido with the establishment of the Hokkaido Government Commission; 11 countries and 86 municipalities are established.
Shima Yoshitake begins the development of Sapporo as capital of Hokkaido
1870 The population within the prefecture grows to about 100,000
1871 Horace Capron is invited from the States to become the advisor for the Development Commission
1873 Development Commission Sapporo Main Office is opened
1876 Sapporo Agricultural College is established; William S. Clark is invited from the States to become the vice-president
1879 Development Commission Sapporo Main Office is burned down
1880 A railroad is established between Sapporo and Temyi (Otaru)
1882 Development Commission is abolished; 3 prefectures are set up in Hakodate, Sapporo and Nemuro
1886 The three prefectures are abolished; Hokkaido Government is established
1888 The Akarenga Government Building is completed
1889 The Akarenga outdoor elements are completed (trees, ponds, etc.)
1896 The octagonal dome and the ventilating stack are removed from Akarenga
1901 The First Hokkaido Prefectural Assembly is held
1909 The fire attacks the Akarenga Government Building
1911 The rebuilding construction of Akarenga is completed
1920 The first national census is implemented; approximate population 2.36 million
1950 The first Sapporo Yukimatsuri (Snow Festival) is held
1967 Development Commission Sapporo Main Office and Akarenga designated as national historic sites
1968 Hokkaido Hundred years Anniversary is held
Akarenga restoration construction is completed
1969 Akarenga is designated as an Important Cultural Property of Japan
1972 Winter Olympics is held in Sapporo; the front yard is designated as an environment protective area for its luscious greens
1988 Seikan Tunnel is established between Hakodate-city and Aomori
2005 Shiretoko is registered as UNESCO World National Heritage
2015 20th national census is implemented; approximate population 5.38 million
2016 Hokkaido Shinkansen (bullet train) opens between Shin Aomori Sta. and Shin Hakodate-Hokuto Sta.
